Instructions

Snowflake appliqué
Using machine appliqué, the open material edges are decorated with a dense satin stitch.

Tear Easy is placed underneath to provide stability and prevents the material from warping during sewing.

1st Step

Transfer the individual parts of the snowflake onto Vliesofix and cut out roughly. For the snowflakes iron on the reverse side of the various materials.

2nd Step

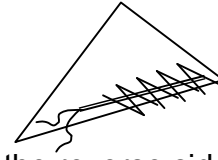

Cut the pattern out exactly along the outline and remove the base paper. Iron the snowflakes onto generously cut background material. Place Tear Easy under the material and fix with pins.

3rd Step

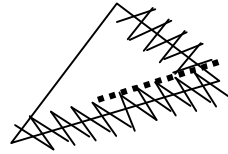

Place an appliqué foot in the sewing machine and decorate the outside edge of the design with a dense satin stitch. To create the satin stitch set a dense zigzag stitch (stitch length approx. 0.4mm, stitch width 3mm). Use Cotton 30 material embroidery thread in the matching colour as a top thread.

4th Step

At the start of the zigzag stitch pull up the bottom thread to the surface using the top thread and sew up with the zigzag stitch.

Once the zigzag edging is complete pull the threads on the reverse side, knot and sew up.

5th Step

After finishing the appliqué carefully remove the Tear Easy from the reverse side.

6th Step

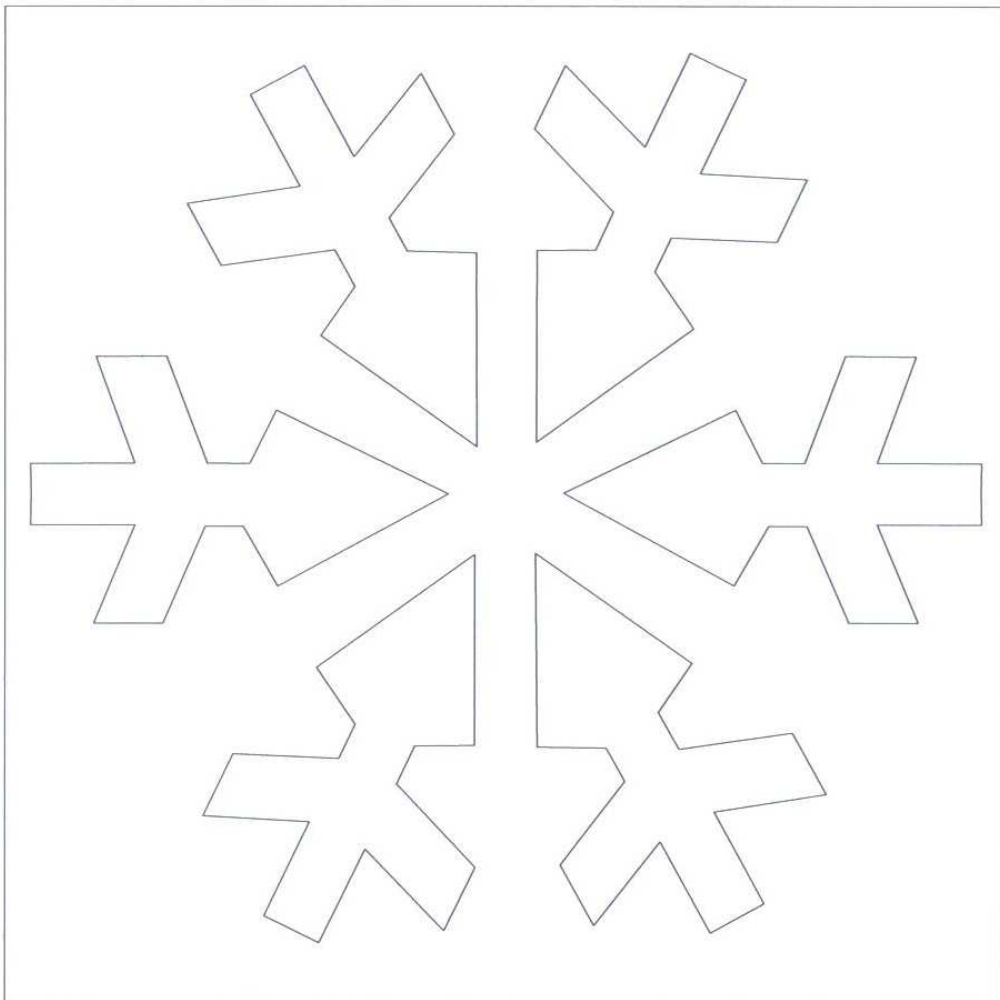

Cut the background material with the finished appliqué design to the exact size with $\frac{1}{4}$ inch as a seam margin, $6\frac{1}{2}$ x $6\frac{1}{2}$ inch.

7th Step

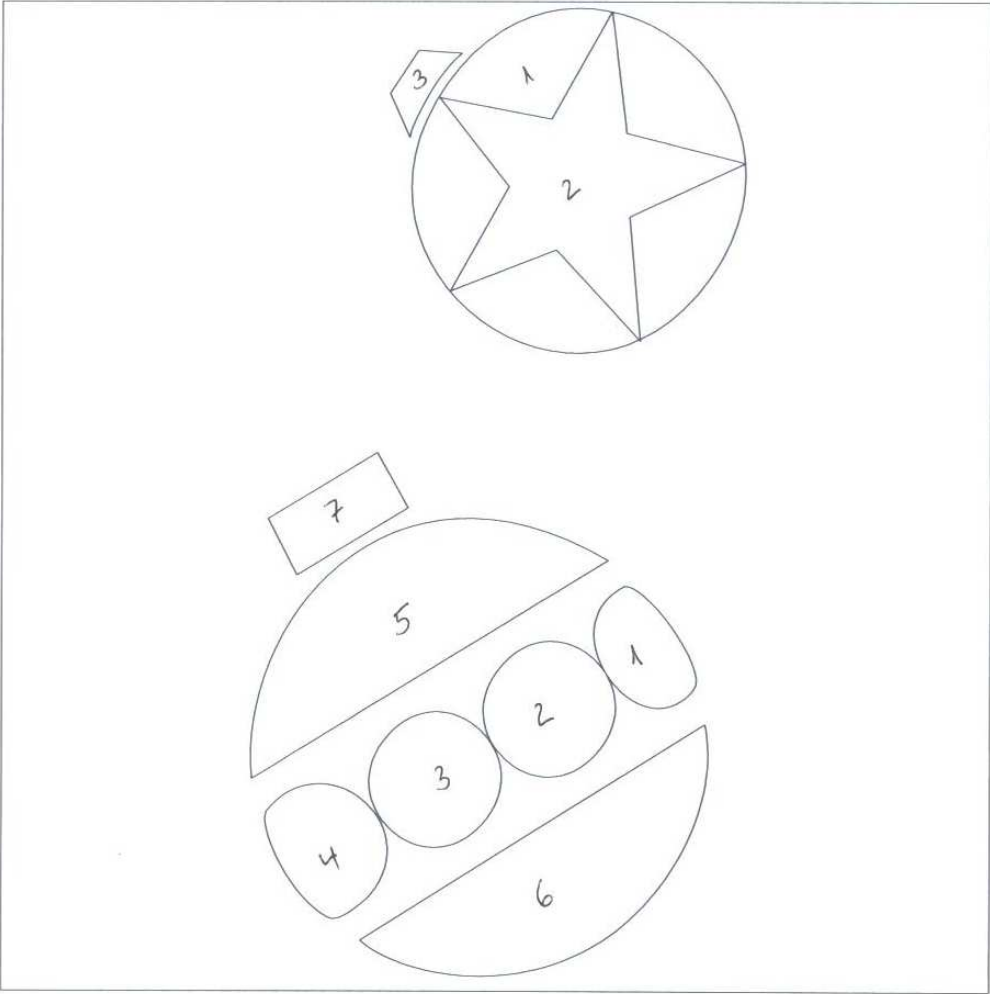

Sew the 4 snowflake blocks together. The finished block is approximately $12\frac{1}{2}$ x $12\frac{1}{2}$ inches.

Both angels and the Christmas tree baubles are appliquéd using the same technique.
