- +++ experienced

Supplies:

- 0,10 m **GÜTERMANN SULKY TEAR EASY** (Roll width: 50 cm)
- 10 x 12 cm **GÜTERMANN SULKY BsN** oder Vliesofix
- 1 spool of **GÜTERMANN SULKY COTTON 30** in green and rosewood (colour 1271 und 1190)
- Fabric pieces of 0,10 m each in green, pink and light beige
- Fabric with rather large printed rose patterns
- Synthetic wadding

Product Information:

Thread:

COTTON 30: machine embroidery and quilt thread made of 100% cotton

Stabiliser:

TEAR EASY: a soft, lightweight, tear-away stabilizer that provides great stability combined with effortless removal .

BsN: is a heat-seal film for ironing on embroidery designs or appliques rather than sewing them on

SIZE: 8 x 8 cm

Broderie Perse

In French "broderie perse" means Persian embroidery, but it also came to refer to the applique of printed chintz flowers and other motifs onto a solid fabric. With the help of the heat-seal film which has an adhesive effect on both sides, it is easy to affix the motifs onto the fabric and then the motifs can be further embellished with embroidery thread.

Cut for the Pillow

2 squares 9,5 x 9,5 cm each

Preparation of Rose Motif:

- Choose a suitable rose motif
- Most suitable are somewhat larger motifs with well defined contours.
- Cut out motif generously and iron on **BsN**.

- Cut out rose and leaves along contours.
- Tear off contact paper and iron motif onto the front side of the pillow

Free Motion Embroidery:

- Place 2 layers of **TEAR EASY** underneath the fabric
- Set up your sewing machine for free motion quilting, drop or cover feed dog.
- Use **COTTON 30** as upperthread and if desired as underthread as well.
- Sew along contours.
- Embellish further by sewing within the blossom
- Carefully remove **TEAR EASY** from the back

Sewing the Pillow

- Place the finished front side onto the cut of the back (left side onto left side)
- Sew around 4 sides of fabric, leaving a gap for turning.
- Turn your pillow right side out and shape seams.
- Stuff it firmly and then hand stitch the opening closed

Enjoy our projects!
